SUMMARY

Skilled backend developer and data analyst with **2 years of professional experience** building **server-side applications** and working with **data-driven solutions**. Strong expertise in **databases, scripting, APIs**, and **data analysis**. Adaptable, self-motivated, and team-oriented, with proven **problem-solving skills** and a passion for **developing efficient, scalable solutions**.

EXPERIENCE

Data Analyst Intern -> Backend Developer

Astrikos AI

📅 07/2024 - 05/2026 📍 Bengaluru

- Designed and **implemented real-time data acquisition** workflows using AVEVA System Platform and integrated with **Modbus, BACnet**, and **MQTT protocols** for industrial and BMS devices.
- Developed Python applications** for device state control and real-time insights utilizing Modbus protocol and RESTful APIs.
- Led Central Vista Project ICCO integration, unifying BMS, Fire Alarm, PAS, VMS, and Perimeter Security Systems for enhanced monitoring.
- Configured **CI/CD pipelines** with **GitHub Actions** and **NGINX** to automate deployment of POC applications.
- Developed interactive dashboards and backend workflows for KMDS Smart City Project, supporting **KPI analytics** and operational insights.
- Built solutions for live video streaming and playback monitoring, improving surveillance and visibility.
- Integrated and streamlined industrial systems for centralized real-time data collection and enhanced decision-making.

Full Stack Web Developer Intern

Mithra Softwares

📅 08/2022 - 09/2022 📍 Shivamogga

- Improved data processing efficiency by **optimizing SQL queries** with the development team for customer database updates.
- Developed a complete website for a school and actively contributed to the redesign and enhancement of a healthcare sector website using **HTML, CSS** and **JavaScript**
- Gained a strong understanding of the end-to-end process of building and hosting a website, from **development to deployment**

ACADEMIC PROJECTS

A Method to Achieve Data Security Using the RSA Algorithm and Fingerprint

Design an RSA encryption method using fingerprint images. Extract minutiae data to generate keys. Create a program to detect minutiae, plot images, and encrypt/decrypt data with RSA.

Development of automatic speech recognition system for Indian dialect

Evaluate ASR system performance using monophone/triphone (tri1, tri2, tri3) with N-gram models. Explore ASR models for accuracy, set environments, and apply training methods. Assess performance by examining Word and Sentence Error Rates.

EDUCATION

M.E. (Big Data Analytics)

Manipal School of Information Sciences (MSIS)
